Total amount	Average weight		300 kg/day		

I recommend the GOMIXER,a wonderful machine for organic waste processing.

Comment from user:

For many years , we had been depending on a transportation company to carry our waste to : disposal location. Some of our staff had to be appointed especially for this task, and gradually the of this grew. Therefore, we needed to find a better solution, both financially and environment

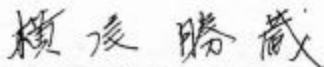

When we saw the brochure for GOMIXER, we compared the price to the amount that we had l spending for years and checked its efficiency and convenier

As a result, we ultimately chose GOMIXER. It is different from other types of machines, i technology does not just simply reduce waste but processes into harmless liquid which can be dr into the sewage system

Moreover, the burden on our staff has been severely reduced, meaning that this machine proven its kindness both to the people and to the eai
