Total amount	20 ka (average weight 15 kg /day)		

I recommend the GOMIXER, a wonderful machine for organic waste processing.

Comment from user:

Our hotels have been earnestly facing the environmental issues which has recently become a serious problem to our society. And waste reducing has been one of the big issues for us, and we attempted to find the best solution.

Now a days, there are many different types of machines available in the market for waste-reduction. Therefore, here are the reasons why we chose GOMIXER.

It is a vanishing type of waste processing machine, so there is no need to worry about decomposed materials. It has an easy dumping system directly into the machine, which is very hygienic for our facility.

Using it everyday, we appreciate this handy and clean technology as being very friendly to our environment.
