

TESTIMONIAL LETTER

User's name (facility) **TSUYAMA CENTRAL HOSPITAL**

Address **1756 Kawasaki, Tsuyama-shi**

Phone : 0868-21-8111 F A X : 0868-21-8200 e-mail

Type of GOMIXER **G 2500** Date of install **Dec. 19, 1999**

Optional system						
Install location	Outdoor					
Draining method	Drain from grease trap into sewage system					
Type of facility	Hospital 525 beds					
Type of waste	①left over meals (83 %) ②vegetable (3 %) ③meat (%) ④fru ⑤rice (14 %) ⑥fish (%) ⑦noodles (%) ⑧processed food (%)					
Total amount	Average weight 360 kg/day					

I recommend the GOMIXER, a wonderful machine for organic waste processing.

Comment from user:

December of 1999, we rebuilt our hospital, and at that time we installed a GOMIXER. I remember that at first, the machine overflowed, so we changed to manual operation. Since then for three

When it comes to maintenance of GOMIXER, we clean the inside once a month, and once every few months we refill the chaff core and GOMIXER supplement.

Left-over meals are decomposed into carbonic acid gas and water; therefore, there is no trouble after processing. There is no odor, and the whole process is so clean. It is certainly a great help to our staff.

I always emphasize to our visitors that the GOMIXER is extremely hygienic and cost-effective.
