**I recommend the GOMIXER, a wonderful machine for organic waste processing.**

Comment from user:

As we all know, environmental destruction is a global issue. Its condition is so critical that we cannot only observe but must be more active in preserving the earth for us and our descendants. In order to do so, we all have to stop and think about our way of living and review our values.

Our town YUZA is facing up to this challenge, and trying our best by executing the Environmental Standardization Project, Environmental Action Guide, Eco-Action Plan, and Neo Energy Vision, etc. Based on these ideas, the town's people and the administration cooperate and effectively implement the necessary changes.

GOMIXER is not only used at public facilities such as schools, kindergartens, hotels, but also in private ones such as individual households. GOMIXER is widely installed here, and people love it. It is so easy to use and powerfully reduces waste, recycle and reuses.

So, I feel honored to recommend to you GOMIXER as it is one of the great saviors of the earth in the 21<sup>st</sup> century.
